

## Skype: Downloading

To download Skype, you will need to go to the Skype website first: [Skype](#).

You'll then click on the "Get Skype" option at the toolbar at the top of the page.

Once you click on the "Get Skype" tab, you will see the following directly underneath the toolbar:

If you are using a Windows computer, click on the "Get Skype for Windows" link. If you are not using a Windows computer, you can click "Other Downloads," which is underneath the "Get Skype for Windows" button, or you can scroll down to find the buttons for the business version of Skype, mobile Skype, Skype on TV, Skype on home phones, and Skype on gaming devices.

The above page should come up. If Skype isn't beginning to download (nothing's coming up on your screen), click "Try Again." Then, the box to the right should pop up. Click "Run."

The box to the left will pop up after you click "run." Let it run (don't click "cancel"). This means it is downloading Skype to your computer.

After the document is finished downloading, the box to the left will come up.. Click "I Agree" (highlighted in the yellow box). By clicking "I Agree," you are accepting Skype's Terms of Use and agreeing to Skype's Privacy Policy. If you would like to view those texts, there are blue underlined links to them at the bottom of the page. Once you click "I Agree," your Skype account should come up.

**Congratulations! You have now downloaded Skype! You will now need to create an account. See the next help doc to learn how to do that.**
